

Clinton Township Sewerage Authority

CTSA was established in 1975 as an independent authority. As our community has continued to expand, CTSA has been able to meet the needs that follow such growth. We have been able to do this because CTSA has been a careful steward of the rate payer's money.

Quality Sewer Service

What does CTSA do?

- CTSA provides wastewater conveyance of approximately 300,000 gallons per day from the households and rate payers to the Town of Clinton Wastewater Treatment Plant.
- CTSA is operated by State of New Jersey C-2 certified licensed operator who meets continuing education and safety training requirements.
- CTSA is a twenty-four hour a day, seven day a week operation. CTSA has consistently achieved compliance with all NJDEP environmental regulations.
- CTSA is an independent authority and not governed by the municipality we service.

Where is CTSA located?

- The CTSA office is located at 79 Beaver Avenue
- CTSA maintains approximately 21 miles of gravity sewer lines ranging in size from 4" to 12" throughout the Township along with 5 miles of force main.
- In 2011, CTSA sewer mains transported an average of approximately 300,000 gallons per day of flow to the Town of Clinton.
- The CTSA practices preventative maintenance and conducts internal inspections of its sewers on a rotating basis. This work has assisted the Authority with finding and correcting problems early and at a much lower rehabilitation cost.
- CTSA operates and maintains 18 pump stations in Clinton Township.
- Our collection system is primarily constructed of ACP, and PVC pipe.

Where do your sewer payments go?

- CTSA uses 100% of sewer payments and connection fees to operate and maintain the collection system, and to pay sewage treatment costs to the Town of Clinton.
